Project Title: Amrita Sher-Gil Website

I would also like to build this site as multiple pages, with navigation across the top or in some other standard place. There is some photography, and a lot of images of her work to build off of. Here is a list of the pages I would include:

- **Home Page/Introduction**
  o Introduce some basic facts about who Amrita Sher-Gil was, and probably include a photograph of her.
- **Personal life**
  o Describe her early life through her death.
- **Early career - European and Western styles**
  o Talk about her earlier artistic education, influences and work.
- **Later career – influence of Indian art**
  o Talk about her later artistic education, influences and work.
- **Legacy**
  o Talk about the importance her work has had in India, and who it influences today.
- **Gallery of work**
- **Sources**
  o List Wikipedia as a source, and any other image sources.
